## Company Profile

YAQI CHAIR MANUFACTURE CO., LTD, established in 2000, is located in Jieyang City, Guangdong Province—one of the largest base for mould injection in China. The company covers a total area of 56,000 square meters.

We are a furniture company which is engaging in R&D, manufacture and sales.

Since the foundation, with the professional technology and first-rate quality, we are specializing in developing and producing a series of steel-plastic chairs that are suited for home, office, restaurant, school and public places for customers from all over the world. Since 2007, we have been cooperating with furniture designers from Italy, Holland, France etc., dedicated to the development of polycarbonate chair.

In 2009, the company introduced a complete set of European equipment. With the gas injection technology of the latest generation and the professional production experience, we have been creating varied kinds of top quality new products which have reached the advanced world level in quality.

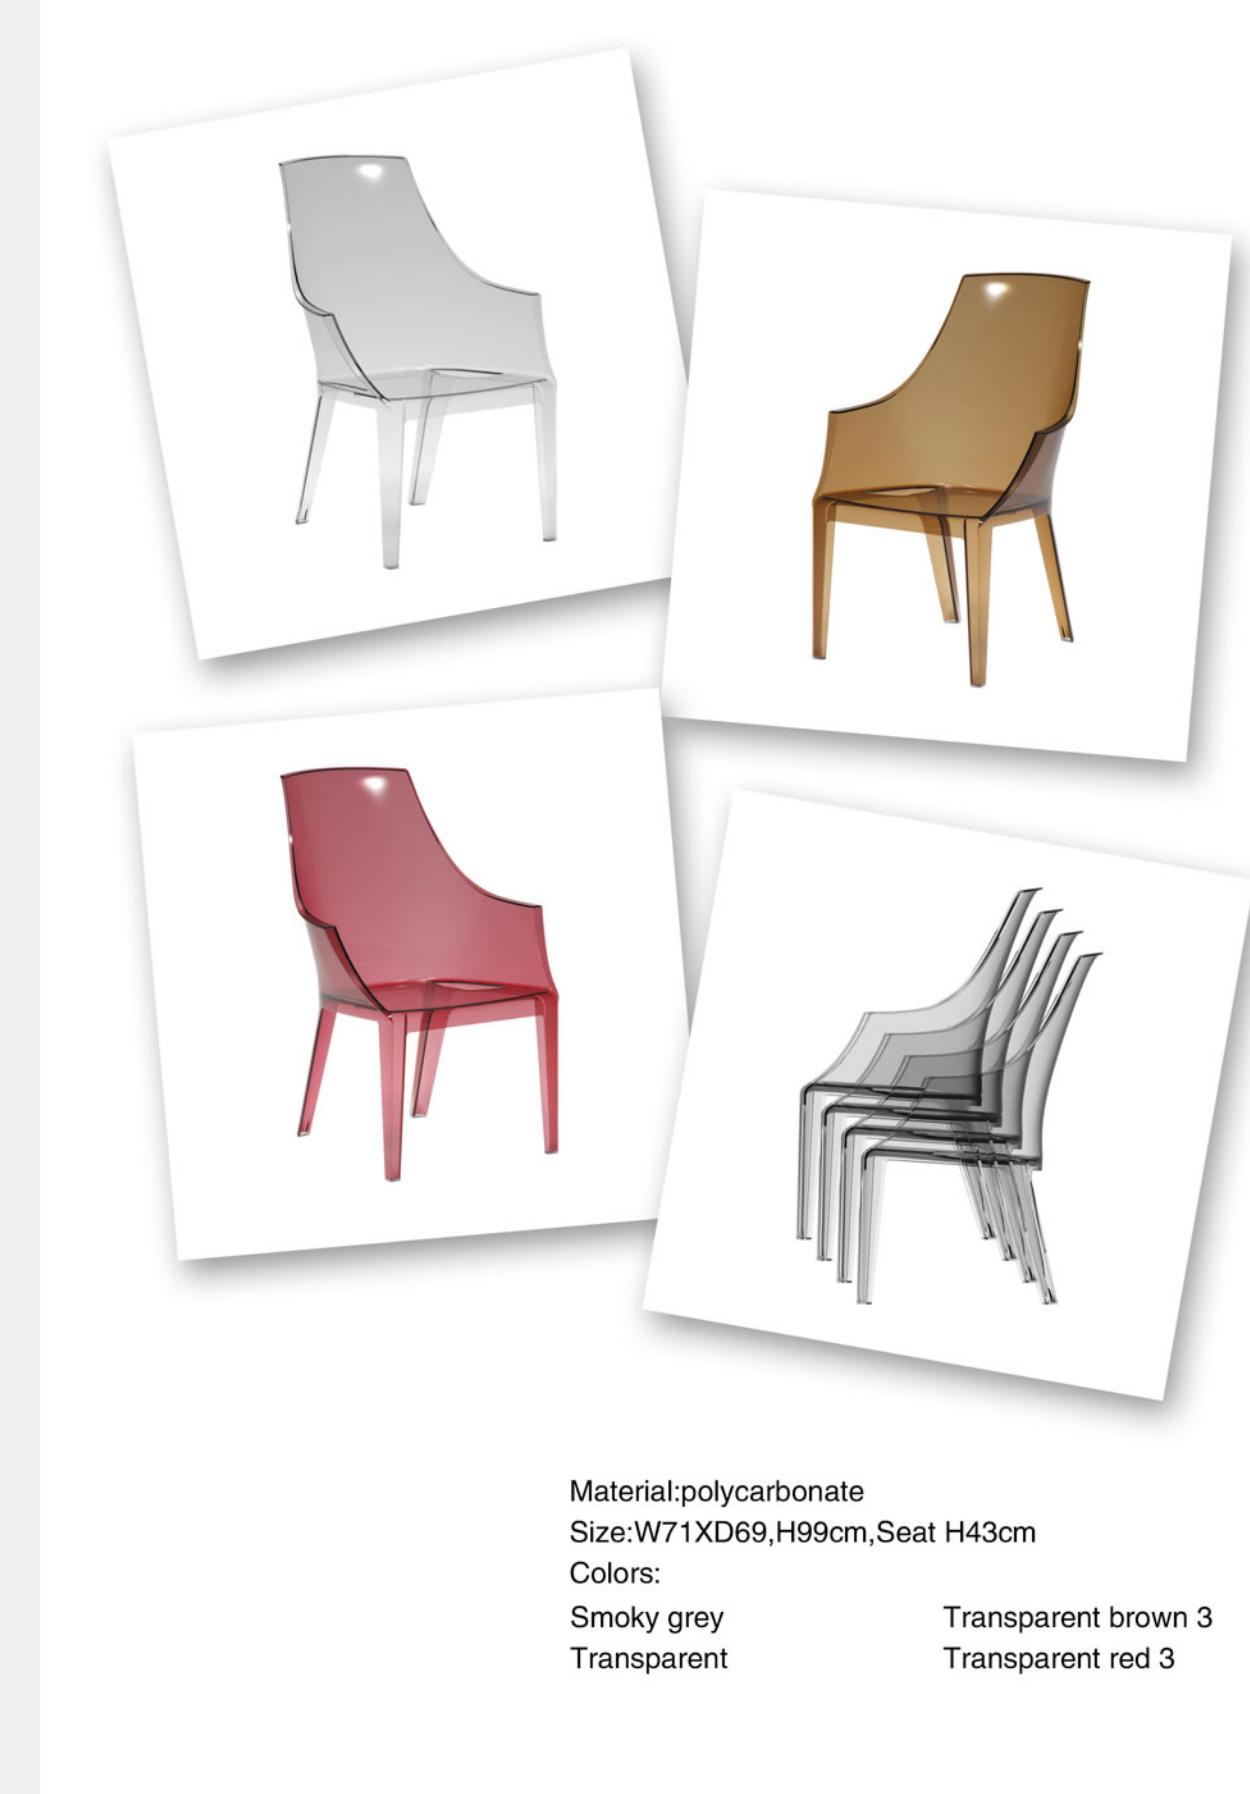

Our company has been committed in “keeping innovating, pursuing perfection”. With the tenet of “Customer first and perfect after-sales service”, we are making effort to build a refined and high quality new brand in furniture.
